

KN95 RESPIRATOR FACE MASK

Masks to keep your employees safe.

A KN95 respirator is a respiratory protective device designed to achieve a very close facial fit along with 95% or greater bacterial filtering of airborne particles and fluid resistance. These industrial masks are often used when air quality is poor and are also worn by health care personnel during procedures to protect both the patient and health care personnel from the transfer of microorganisms, body fluids, and particulate material.

WHY ROS?

Since 1997, ROS has been providing affordable, high quality medical equipment to facilities around the world. We are currently selling PPE to fortune 500 companies and can supply you with protective masks, to help keep your employees safe.
